

LEGEND

SPECIAL FLOOD HAZARD AREAS INDICATED BY SHADING:

- ZONE X** No base flood elevation determined.
- ZONE AE** Base flood elevation determined.
- ZONE AH** Flood depths of 1 to 3 feet usually area of protection; base flood elevation determined.
- ZONE AD** Flood depths of 3 feet usually shown from on-shore winds; average depth determined; top area of flood fan flooding; wind-surge also determined.
- ZONE A98** To be protected from 100-year flood by special flood insurance policy under community plan.
- ZONE V** Coastal flood with velocity hazard factor active; base flood elevations determined.
- ZONE VE** Coastal flood with velocity hazard factor active; base flood elevations determined.

FLOODWAY AREAS IN ZONE AE

OTHER FLOOD AREAS

- ZONE X** Area of 100-year flood, area of 100-year flood with average depth shown from 1 foot or more above the flood elevation and area protected by levee from 100-year flood.
- ZONE D** Area in which flood hazard are undetermined.

UNDEVELOPED COASTAL BARRIERS

- Rooftop Boundary
- Floodway Boundary
- Zone D Boundary

BOUNDARIES

- Boundary Shading, Special Flood Hazard Zone, and Boundary Shading Area of CO-located Coastal New Flood Hazard Within Special Flood Hazard Zone.
- Base Flood Elevation Lines (Elevation in Feet)
- City Section Line
- Base Flood Elevation in Feet Where Unlabeled Within Zone*
- RM 7.4 Elevation Reference Mark
- RM 1.5 Elevation Reference Mark

*Reference to the National Geodetic Vertical Datum of 1989

NOTES

This map is for use in administering the National Flood Insurance Program; it does not necessarily identify areas subject to flooding, particularly those flood discharge areas of small size, or all structures located outside Special Flood Hazard Zones. The community may choose to limit the availability of insurance coverage to certain areas.

Coastal flood hazard depths with 100-year A98 depth and include the effects of surge and storm surge elevations may also differ slightly from those developed by the National Weather Service for hurricane preparation planning.

Areas of special flood hazard (100-year flood) include Zones A, AE, AH, AD, A98, X, and V.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures.

Boundaries of the floodway areas were computed at cross-sections and interpolated between cross-sections. The boundaries were based on field observations and with regard to requirements of the Federal Emergency Management Agency.

Floodway widths in some areas may be too narrow to allow floodway widths as provided in the Flood Insurance Study Report.

Elevation reference marks are described in the Flood Insurance Study Report. For updating requirements see separate project map notes.
